

Zero Carbon Ready 2035

In partnership with Worcestershire County Council and Pro Enviro, Joerns Healthcare is working towards Zero Carbon Ready 2035. To assist us in achieving this goal, the following core items are being considered and worked on:

- ✓ Installation of LED Lighting
- ✓ Installation of Ceiling Insulation
- ✓ Installation of Solar PV Array
- ✓ Utilisation of Electric Vehicles
- ✓ Utilisation of Air Source Heat Pump

In addition, as a result of staff awareness training and the implementation of internal processes and controls, Joerns Healthcare could achieve annual carbon savings of at least 47.49 tonnes of CO₂e.

This project is funded by the UK Government through the UK Community Renewal Fund. The UK Community Renewal Fund is a UK Government program. It aims to support people and communities most in need across the UK to pilot programmes and new approaches to prepare for the UK Shared Prosperity Fund. It invests in skills, community and place, local business, and supporting people into employment.
